

# TIVAR® 88

## Product Overview

Recognized worldwide as the premium lining material for bulk material handling, TIVAR® 88 is noted for its performance in promoting bulk solids flow of cohesive or non-free flowing materials due to its low surface friction. TIVAR® 88 liners are the perfect solution when you need to reduce or eliminate arching, ratholing and erratic material flow challenges in bins, bunkers, hoppers and chutes, railcars, etc.

| TIVAR® 88                                                                                                                                                                                                                                                                                                                 | INDUSTRIES                                                                                                                                                                     |
